

Accepting cards shouldn't be painful. Card processing is purposely confusing. Many in our industry benefit by hiding fees, unfair terms, and other shady methods to take advantage of independent business owners. That's why Dan Price founded Gravity Payments in 2004 after witnessing many of the community businesses in his neighborhood being ripped off. Looking into the industry, he realized he could provide small-to-midsize businesses the same competitive programs with better support and service. Since then, we've made it our mission to protect community businesses from being overcharged and underserved.

### Tools to help grow your business:

- Card Processing: Gravity Payments seamlessly integrates with point-of-sale systems, mobile, eCommerce, and online gateways. We'll help your business accept all major card types through EMV chip cards, swipe, or contactless payments like Apple or Samsung Pay.
- Point-of-sale: We take the time to match the right POS solution to your business, because every business is unique.
- Mobile: Accept payments anywhere at any time with our wide range of the latest mobile payment solutions.
- eCommerce: Gravity Payments will help provide a safe and easy experience for your customers to purchase your products and services online.

### Why ACU powers payment processing through Gravity Payments:

- 24/7 Support: Gravity Payments' dedicated Support Team is always available 24/7 to respond to any request.
- Consultative Approach: We listen first, because we want to hear what your needs are. That way we can focus on finding the right solution that is going to help your business grow.
- Complete Transparency: We don't hide anything in the fine print or confuse you with industry jargon.
